

AGRU Poly-Flo

Advantages & product range

- Low required space
- Fast and simple welding due to simultaneous welding
- Full pressure resistance of medium pipe
- No additional spacers required
- Easy handling when shortening pipes
- Cost-efficient system
- Annular gap optimized to the minimum
- Produced in only one manufacturing process

The AGRU double-containment piping system is successfully established since years and does fulfill the complex requirements for piping systems in the field of chemical engineering. Our new Poly-Flo system is an enlargement of our double-containment piping system which has proven its worth over years.

This innovative system wins over with optimal space management as well as with a cost-efficient solution. Simultaneous welding is the most practical connection method and offers the most simple and competitive method regarding installation. On request other connection methods are available.

SUPPLY RANGE Pipes and Fittings

material

PPR/PPR

PE 100-RC/PE 100-RC

dimensions

DIM 50/32 – SDR17/11

DIM 90/63 – SDR17/11

DIM 160/110 – SDR17/11
