

The Plastics Experts.

AGRU Image

Vision

AGRU is established as the world's leading single-source supplier of high-quality engineering plastic products. Customers all over the world trust our reliable and high-performing systems. Together, we are part of the solution.

Mission

AGRU supplies high-quality plastics technology that makes customers from different industries successful worldwide. From semi-finished products and injection-moulded fittings to customized parts, we focus on uncompromising quality, outstanding customer benefits, reliability, and technological advantage. The plastics expertise and customer focus of our employees make AGRU a successful global player.

AGRU customer orientation

Majority owner

AGRU – named after its founder Alois Gruber – is a true family-owned enterprise. The company is led by Mag. Alois Gruber in partnership with his son, Alois Gruber Jr. Alexander Gruber plays an active role in the business, alongside the Haager family, who are stakeholders. AGRU's corporate culture is defined by clear, results-driven decision-making, long-term strategic continuity, and a strong commitment to reliability. Customers across industries value AGRU's high degree of flexibility, fast response times enabled by flat organisational structures, and the consistent dependability of its products and services. AGRU is aware of its social responsibility.

„Uncompromising quality, outstanding customer value,
and high operational reliability are our guiding principles.“

Satisfying requirements with precision

AGRU has built a reputation for satisfying its customers' wishes efficiently, cost-effectively and with superlative flexibility. Customer-oriented technical solutions, the ability to think outside the box and decades of hands-on experience are what it takes.

AGRU production

Technology leadership

Producing at the cutting edge of technology, improving processes and optimising results are part and parcel of AGRU's guarantee of competitiveness. Day in, day out, we demonstrate our cost and quality leadership in our plants all over the globe. The technological edge means that AGRU solutions are consistently among the best in their field.

Manufacturing expertise

Quality and cost leadership are another two of our maxims. So our customers profit from state-of-the-art technologies with an attractive price-performance ratio. One major plus is our technological diversity: injection moulding is one of our core competences and another is the extrusion of thermoplastics. And working with fibre composites and fluoroplastics is an established tradition at AGRU.

Productivity

Productivity means combining know-how, automation technology, meticulous craftsmanship, process reliability, lean manufacturing and efficiency in the best possible way.

Top-grade fittings

Maximum customer benefit

AGRU fittings for medium-retaining pipes are hallmarked by uncompromising precision, robustness and system logic. In this respect, functionality and cost-effectiveness are two sides of the same coin. As an industry leader, our company produces injection-moulded fittings of enormous design complexity, using the very latest technologies.

„Piping systems from AGRU deliver on everything the manufacturer promises.“

Operational safety

Our products are optimized for real-world operation through extensive test procedures, including abrasion tests as well as rigorous leak-tightness and burst pressure tests. These safety reserves ensure that AGRU users can rely on quality, operational safety, reliability and durability.

Efficient production

Efficiency

At AGRU, efficiency starts with product development. We focus on material-efficient design and the material-specific recycling of residues.

Flow simulations and material analyses result in fittings with optimal flow properties during operation. Procurement processes focused on high quality, efficient manufacturing methods and the robustness of AGRU products create customer value across our entire product range.

Internal Circular Economy

The recycling of waste generated during production further increases efficiency. Residual polymer quantities generated during the manufacturing process are separated by material type. This allows them to be returned to the material cycle and reused.

The Plastics Experts.

Application-technical consultation

In many cases, the material determines whether a technical solution will be cost-effective. It must be well suited to the actual conditions to resist chemicals, heat, and mechanical stress. Application-specific material selection is one of AGRU's

core competences. As a professional partner for everything associated with plastics, AGRU can point out the most economical solution for any problem, no matter how big the challenge.

Precision welding - for durable joints

With a global reputation as an innovative plastics expert and reliable business partner, AGRU offers comprehensive know-how plus many years of experience in material selection and installation of its products. In particular in welding technology AGRU continues to be a pioneer who sets new benchmarks with ground-breaking innovations.

AGRU product innovations

AGRU SmartFit Pipe Clip 049.8 designed for plastic piping systems with larger diameters

Technology. Precision. Application Expertise

Whether it's custom components, complex piping systems, or ultra-pure parts – AGRU delivers precisely manufactured systems that meet the high requirements of the market and our customers. We combine cutting-edge manufacturing technology with decades of materials expertise and practical application know-how. This makes us the preferred partner for industry, infrastructure, and high-tech sectors.

AGRU electrofusion welding machines with Short Circuit Protection (SCP) system

„Numerous worldwide patents and continuous new applications underline the innovative strength of the AGRU Group and its global activities.“

SP 110-S V3.1 - Premium welding technology for plastic piping systems

AGRUCAD Digital Libraries for efficient digital piping design

CleanCut 315 cutting machine for precise pipe processing in cleanroom quality

Supply Chain & Support

Innovation is the key to success

AGRU's plastics engineers are focused on the future. Only those who today are dealing with the customer- and target-group-specific requirements of tomorrow will be successful in the future.

Services

AGRU's strengths extend well beyond the processing of plastics. Depending on customer requirements, the company offers services including:

Applications-engineering consulting in all build phases, selection of materials, training in welding processes, field supervisors, rental and sale of welding machines, day-definite delivery and much more.

10,000 m² floor space (ISO Class 5)

Modular manufacturing in a cleanroom

Manufacturing & pre-assembly

AGRULINE

The user-friendly PE 100-RC piping system

RELIABLE MEDIA TRANSPORT

Under extreme conditions

LASTING CONNECTIONS

With electro-socket or heated tool butt welding of PE 100-RC

COST-EFFICIENT INSTALLATION

Without sand embedding

ONE-STOP SHOPPING

Complete piping system for gas, hydrogen, water, waste water and chemical media

AGRU XXL piping systems

FM-approved

PE 100-RC fittings

AGRUCHEM

Piping systems for industrial applications

FAST & EASY INSTALLATION

Pipes, fittings and customized solutions perfectly harmonized

MAINTENANCE FREE PIPEWORK

Welded joints and materials for high operational reliability

DOUBLE OPERATIONAL SAFETY

The compact Poly-Flo double containment piping system is highly reliable

HIGH MEDIA RESISTANCE

Pipes and fittings made from PE 100-RC/PP/PVDF/ECTFE

Double containment piping system Poly-Flo

PE-el piping system

Fluoroplastic system

PURAD

High purity piping systems

HIGHEST PRODUCT PURITY

Production of all system components in ISO class 5 cleanrooms

ONE STOP SHOPPING

Pipes and fittings from one factory for highest performance

UNIVERSAL APPLICABILITY

Perfectly adjusted system components in PVDF UHP, ECTFE, PP Pure, PP nature

LONG-TERM RELIABILITY

Exclusive processing of selected premium thermoplastics

PVDF UHP, ECTFE, PP, PP Pure

Production in an ISO Class 5 cleanroom

Integrated system solution

CUSTOMIZED PARTS

Tailor-made fittings for pipeline construction

FITTINGS WITHOUT LIMITS

For any geometry, dimension and pressure load

OUTSTANDING MATERIAL VARIETY

From PE to high-performance plastic ECTFE

HIGH COST-EFFICIENCY

Engineering services from the industry's best

READY-TO-INSTALL PREFABRICATION

Fast and precise isometric production

CUSTOMIZED PARTS brochure

Highest precision

Materials without compromise

High cost-efficiency

SEMI-FINISHED PRODUCTS

Made from PE, PP, PVDF, ECTFE, FEP, PFA

EXTRUDED SHEETS

Consistently high quality thanks to years of experience in extrusion technology

FABRIC BACKING SYSTEM

Chemically resistant fabrics made of various materials

ROUND BARS, BLOCKS, PRESSED SHEETS

Cost-effective production thanks to a wide variety of dimensions and materials

LINER PIPES

Time- and cost-saving installation made of PVDF, ECTFE, FEP and PFA

SEMI-FINISHED PRODUCTS brochure

Fish farming PE sheets

Bonding on steel

Lining

CONCRETE PROTECTION

Corrosion protection for concrete structures

FIRMLY SEALED SURFACES

Corrosion protection and sealing made of chemically stable plastics

FOR EVERY REQUIREMENT

Wide range of materials available (PE, PP, PVDF, ECTFE)

HIGH ECONOMIC EFFICIENCY

Simple assembly, long-proven materials and quality

HIGH OPERATING RELIABILITY

Excellent weldability ensures leak tightness

AGRUSAFE brochure

AGRU-Ultra Grip

HYDRO^{CLICK} / HYDRO⁺ for drinking water tank

Solutions for every requirement

LINING SYSTEMS

Geomembranes

CORROSION PROTECTION

Tunnel liners protect the inner concrete shell from aggressive mountain water

EARTH AND FOUNDATION WORK

For mining, landfill and hydraulic engineering as well as for the agricultural sector

ONE STOP SHOPPING

Lining systems, water stop profiles, perforated pipes, discs available

PROVEN QUALITY

AGRU Lining systems are in compliance with many international standards

LINING SYSTEMS brochure

Hydraulic engineering

Mining

AGRUFLEX Tunnel liners

WELDING SYSTEMS

Premium welding technology

BEADLESS WELDING

Suitable for smooth surfaces in the semiconductor, life sciences, and food industries

CONTACTLESS WELDING

Infrared technology for highest purity with and without bead

BUTT WELDING

For pipe diameters up to OD 3500 mm

INDUCTION WELDING

For concrete protective liners, geomembranes and piping systems

Infrared welding:

- SP 110-S V3.1
- SP 250-S V3
- SP 315-S V3
- SP 500-S combi
