

# New special format for sheets

PE-SHEETS NOW WITH 17.5 / 22.5 / 27.5 MM THICKNESS AVAILABLE

- **Very good chemical resistance**  
Long service life, even with aggressive media
- **One stop shopping**  
Comprehensive semi-finished product portfolio and extensive stock-keeping
- **Consistently high quality**  
Raw material specifications, cutting-edge production & quality assurance

The semi-finished products made of thermoplastic materials from AGRU are distinguished by their high acid and alkali resistance. This results in lower life cycle costs due to extended maintenance intervals and the long service life of the products. Consistent high quality ensures the reliability and long service life of all components.

Semi-finished products made of PE 100-RC are characterized by high toughness and very good chemical resistance, and can be used from -40 °C to +60 °C.

Other characteristics of semi-finished products made of PE 100-RC include the following:

- good resistance to wear
- very good electrical insulation
- high vibration damping
